# Entipur® Monitor™

Entipur® Monitor™ Manifold includes bypass valve, 1" FNPT fitting kit, Meter, Meter Control, transformer and S1, S2, S3 sample taps.

Choice of Filter Media available to suite your application needs

Down-flow Tank Heads

Inside each Mineral Tank is an upper distributor screen and lower distributor screen with 1.05" distributor tubes.

The Entipur® Monitor™ uses best management practices for treating drinking water for contaminants such as arsenic, uranium, V.O.C.'s, and radium, and integrates twin tanks, water sample ports, and meter control into one system.

Meter Control monitors water use with 80% threshold yellow flashing light, 90% threshold red flashing light, and beeps when threshold gallons is met. Also displays flow, total flow and peak flow.
